Summary

Agile and highly adaptable Data Engineer with 7+ years of experience in enterprise-scale data engineering and analytics within the banking sector. Specialized in automating financial reports, migrating legacy systems to AWS cloud, modernizing data pipelines, and delivering end-to-end BI solutions. Passionate about transforming data into strategic business insights to drive growth and efficiency.

Key Achievements

- Reduced manual effort for financial reporting by 80% through automated report generation.
- Improved report delivery times by 50% with the T24 Mobile Banking Data Mart.
- Maintained 99.9% SLA compliance during the data warehouse migration to AWS.
- Migrated more than 2.2 billion rows of historical archive data from on-premise to AWS.

Skills

- Data Modeling & Architecture
- Business Intelligence & Data Analytics
- Data Warehousing & ETL Design
- SQL Query Optimization & Complex Queries
- Big Data Processing & Frameworks
- Real-time Data Streaming & Ingestion
- Workflow Orchestration & Automation
- Dashboard & Report Development
- Cloud Data Solutions (AWS & Azure)
- Programming & Scripting (Python, SQL)
- Version Control & CI/CD Practices

Soft Skills

- Communication & Collaboration
- Problem Solving & Analytical Thinking
- Stakeholder Management
- Leadership & Team Coordination
- Time Management & Prioritization
- Agile & Adaptability

Technical Tools

- Cloud & ETL: AWS (Glue, Redshift, S3), Microsoft Azure
- Data Lake: Apache Hudi, Apache Iceberg
- Orchestration: AWS Step Functions, Control-M

- Databases: SQL Server, Azure SQL Database, Oracle, PostgreSQL, Redshift, Impala, Hive
- ETL Platforms: Talend, SSIS
- BI & Visualization: Tableau Desktop & Server
- Languages & Frameworks: SQL, Python
- Other: SSMS, SSDT, Microsoft Office Suite
- DevOps & CI/CD: Git, CI/CD Pipelines
- Core Banking Platforms: Temenos T24, Core Prospera

Experience

Nov 2020 – Present

Data Engineer & BI Engineer | PT Avows Technologies (PT Bank BTPN Syariah)

Technologies: SSIS, AWS Glue, Step Functions, Redshift, S3, Apache Hudi & Iceberg, Azure SQL, Tableau

- Gather and analyze business requirements to architect robust data pipelines and ETL frameworks.
- Develop SSIS packages to load and transform data into APS, and orchestrate AWS data processing from source to data warehouse using Step Functions.
- Build interactive dashboards in Tableau, enabling stakeholders to monitor KPIs and make data-driven decisions.
- Led migration of on-premise data warehouse to AWS, ensuring minimal downtime and data integrity.
- Migrated pipeline scheduling from Control-M to AWS Step Functions and am moving the data lake from Apache Hudi to Apache Iceberg for better performance and cost.

Jun 2019 – Oct 2020

Data Engineer | PT Anugrah Karya Abadi (PT Bank Mandiri)

Technologies: Talend, SQL Server, Hive

- Developed end-to-end ETL processes using Talend to ingest and cleanse banking data into the enterprise data warehouse.
- Automated generation of financial reports, reducing manual effort by 80% and improving accuracy.
- Collaborated with cross-functional teams to define data model enhancements and improve query performance.

Education

Sarjana Teknik (S.T.), Informatics Engineering

Universitas Pembangunan Nasional “Veteran” Yogyakarta · Faculty of Industrial Engineering

Sep 2014 – Jan 2019 · GPA: 3.67/4.00 (Cum Laude)

Languages

Indonesian (Native) · English (Conversational)

Projects

Bank BTPN Syariah

- Data Warehouse Migration (on-premise to AWS): Led migration of the on-premise data warehouse to AWS (Glue, Redshift) with 99.9% SLA compliance, including 2.2+ billion rows of historical archive data and all Tableau connections.
- Control-M to AWS Step Functions Migration (2024 – 2025): Moved scheduled pipelines into a Step Functions orchestration framework and tuned Redshift job stability.
- Data Lake Modernization, Apache Hudi to Apache Iceberg (2026, ongoing): Migrating ODS tables to Iceberg (57 tables in phase 2.1) for better query performance and cost.
- Remote Audit System (2023 – 2025): Built about 90 new anomaly rules for internal audit using SSIS-based ETL, Azure SQL and Tableau dashboards.
- T24 Mobile Banking Data Mart: 50% faster report delivery through streamlined Azure SQL data flows.
- Data Ingestion to ODS & Data Marts (2022 – 2026): Source-to-mart pipelines for core banking (T24, Prospera), treasury, PSAK, mobile banking and cybersecurity data; data validation for the T24 upgrade.
- Executive Dashboards (2022 – 2025): Tableau KPI dashboards for business and IT teams.
- Risk Integration System: End-to-end data integration with SSIS, Azure SQL and Tableau.
- Data Platform Frameworks (2023 – 2026): Reusable Excel/CSV upload framework, data archiving to Amazon S3, and SSIS refactoring with Azure SQL tuning.

Bank Mandiri

- Regulatory Reporting (LHBU 602 & 603, LHKPN): Built Talend pipelines to automate daily regulatory submissions.
- Anti-Money Laundering & Float Reports: Developed Talend jobs and SQL Server procedures for compliance and liquidity monitoring.

Certifications & Training

- Tableau 14-Day Bootcamp (Certificate of Completion)
- Udemy: AWS Certified Data Engineer – Associate Course (Certificate of Completion)
- Udemy: Master Course in Tableau for Business Intelligence (Certificate of Completion)
- Udemy: Microsoft SSIS Training (Certificate of Completion)
